Software: MS Office (Word, Excel, PowerPoint), FlutterFlow, Firebase, Canva, Figma, Google Cloud, GitHub, VS Code, Adobe Illustrator, Adobe Photoshop

EDUCATION

Clark Atlanta University, Atlanta, GA

Bachelor of science in Computer Science

RELEVANT EXPERIENCE

HBCU Elite — *Operations and Social Media Intern* (May 2025 -June 2025)

- Coordinated player sessions and enforced event schedule adherence across multiple locations. Managed logistics including food distribution, sponsor and facilitator support, and player wellbeing. Acted as a key point of contact for operations during camp execution.
- Designed social media graphics and flyers for Instagram, collaborating with videographers to produce branded media content. Executed all responsibilities under tight deadlines to ensure smooth and successful event delivery.

CodeHouse — *Scholar & Ambassador* (July 2021 – May 2025).

- Selected as part of the inaugural cohort of CodeHouse Scholars, receiving mentorship, technical training, and career development support. Advocated for increased CodeHouse presence at Clark Atlanta University, resulting in expanded scholar representation across future cohorts.
- Served as Campus Ambassador, promoting program awareness, leading recruitment efforts, and coordinating community service events. Built peer networks and organized tech-focused initiatives to foster academic success and professional growth for underrepresented students in STEM.

PayPal — *Software Engineer and UX/UI Intern* (May 2022 - August 2022)

- Collaborated with a team of people to develop and implement new features for a customer-facing web application, using technologies such as HTML to increase user engagement.
- Contributed to usability testing sessions, analyzing feedback and data to identify pain points and propose design enhancements.

PROJECTS

- Brown Sugar Beauty Supply – Full-stack e-commerce site with authentication and cart (HTML, Node.js, MongoDB).
- Skincare Routine Tracker – Mobile app with Firebase backend for skincare checklists and notifications (FlutterFlow, Firebase).
- Digital Forensics Capstone – Used Autopsy and Foremost to extract evidence from forensic disk images.
